

Name:

Per:

Due: Friday, September 6, 2019
(at the beginning of class)

#mylifeasamathproblem

This project will be collected, saved, and included as the mathematics component for your 7th grade *Who Am I* binder. Every 7th grader must complete this project.

My 6th graders will also complete this to receive a grade.

Directions

Make an Instagram story using the given template. Your story must include pictures (or drawings) and four mathematical statements about yourself. Some example mathematical statements include:

- My family includes my mom, my dad, my brother and myself. Since there are two males and two females in my family, the male to female ratio is 1 : 1.
- Most nights I fall asleep around 10pm and wake up at 6am. This allows me 8 hours of sleep, which is equivalent to 480 minutes or 28,800 seconds.
- I was born in 2006, so I am (or will be) $4^2 - (8 \div 2)$ years old.

Poster Requirements

- | | |
|---|-------------|
| • four photos or drawings that depict your mathematical statements | _____ 4 pts |
| • your first and last name - large and legible | _____ 2 pts |
| • four mathematical statements that tell us <i>something</i> about you and/or your life | _____ 4 pts |
| • mathematical statements are complete sentences | _____ 4 pts |
| • mathematical statements are typed or neatly handwritten | _____ 4 pts |
| • color and neatness | _____ 2 pts |

Total _____ / 20 pts
